

The F-900 Research Kit provides a comprehensive way to measure directly from fruits or from static samples in any environment.

The F-900RK Includes the Following (F-900 Ethylene Analyzer sold separately):

- 2 liter chamber with solid bottom plate for closed air-tight measurement, and bottom plate with seal for on-plant measurement
- Chamber wand with flexible tubing assembly
- Syringe
- Sampling bag
- Silica gel
- Injection Port Kit for small volume sampling
- Hard shell instrument carrying case
