

Eppendorf Fixpenser 4781 Repetitive Pipettor

The Fixpenser is a hand dispenser for repetitive, exact dispensing of a certain volume.

Two transparent 60ml bottles, a Brown 30ml bottle for light sensitive reagents and a stand are enclosed as accessories. One of the 60ml bottles is provided as a rinsing bottle. In order to avoid confusion with the reagent bottle, the rinsing bottle should be marked accordingly.

The Fixpenser together with a filled supply bottle and the stand can be stored in the refrigerator.

Technical Specifications

Volume (µl)	Max Dispensing Steps with 60ml Bottle	Max Dispensing Steps with 30ml Bottle	Inaccuracy (%)	Imprecision (%)
50	1150	570	± 1.5	≤ 0.7
100	580	290	± 1.0	≤ 0.5
200	290	140	± 1.0	≤ 0.5
250	230	110	± 1.0	≤ 0.5
500	110	50	± 0.8	≤ 0.4
